Grant-in-Aid for Scientific Research 1989 (Grant-in-Aid for General Scientific Research C) Report of Research Results

February 1990

Head Investigator Motoaki Sugawara The Heart Institute of Japan Tokyo Women's Medical College

Research Group

Head Investigator

Motoaki Sugawara, Associate Professor The Heart Institute of Japan Tokyo Women's Medical College

Investigators

- (1) Kiyoharu Nakano, Research Associate The Heart Institute of Japan Tokyo Women's Medical College
- (2) Kenji Nakamura, Lecturer The Heart Institute of Japan Tokyo Women's Medical College

Research Grants

1988 - 1,200,000 yen 1989 - 900,000 yen

Total 2,100,000 yen

Publications and Presentations

Original Paper

Nakano K, Sugawara M et al.: Regional work of the human left ventricle calculated by wall stress and the natural logarithm of reciprocal of wall thickness. J Am Coll Cardiol 12:1422-1448, 1988

Book

Sugawara M, Nakano K: A new method of analyzing regional myocardial function of the ventricle.

In: Hori H, Suga H, Baan J, Yellin EL (Eds) Cardiac Mechanics and Function in the Normal and Diseased Heart. Springer-Verlag, Tokyo, 1989, pp249-256

Oral Presentations (Abstracts)

Sugawara M, Nakano K et al.: Measurements of regional work:normal subjects and patients with myocardial infarction. Jpn J Appl Physiol 18 Suppl:178-179, 1988 (in Japanese)

Sugawara M, Hirai A et al.: A new index of contractility independent of the heart size. Jpn Circ J 53:581, 1989

Sugawara M, Hirai A et al.: A new index of cardiac contractility:normalized Emax.

Jpn J Appl Physiol 19 Suppl:166, 1989

Sugawara M, Asanoi H et al.: A new method of obtaining regional work of the ventricular wall by measuring wall thickness:clinical applications. Jpn J Med Ultrason 16 Suppl II: 649-650, 1989
